## INTRODUCTION

Welcome to the NEO-GEO MULTI VIDEO SYSTEM. This system can hold two (MV-2) or four (MV-4) different NEO-GEO games in one cabinet, which enables you to save space and maximize your income. Only one compact set of P.C. boards with 2/4 slots for different games are required in one cabinet. The game cartridges can be easily inserted or removed from the slots. This is one of the remarkable advantages of our MVS.

Please read this service manual carefully before starting to use the MVS and keep it at your side for further reference.

## CAUTION

◇ Use the logic probe for examination of the circuit on the IC boards. Testers cannot be used for this purpose.

◇ To set up the MVS, avoid the following places:

\* Where leaks or dew from moisture may be caused

\* Humid places like indoor swimming pools and showers

\* Where direct heat strikes or in the hot air

\* Near ignitable or volatile chemicals and other dangerous articles

\* Near emergency exits or fire extinguishers

\* Inclined places or near vibrating places

\* Dusty places

◇ Keep the temperature between 5°C and 40°C.

◇ Do not put heavy objects on top of the PCBs.

◇ Do not transport the cabinet with the cartridges inserted in the main PCB.

◇ Use AC95V to AC105V for the power supply and do not use other devices from the same power source.

◇ Connect the ground wire to the cabinet's ground terminal and the cabinet should be grounded.

◇ The 56 pin main connector is a different one from JAMMA 56 pin and should be used with connection to the MVS cabinet.

# [1] MV - 2

## 1-1. COMPONENTS

MV2 consists of 2 P.C. boards.

MV2-----Main programming, character display

MV-LED---Credit indicator

## 1-2. HARNESS CONNECTION

CREDIT DISPLAY PCB

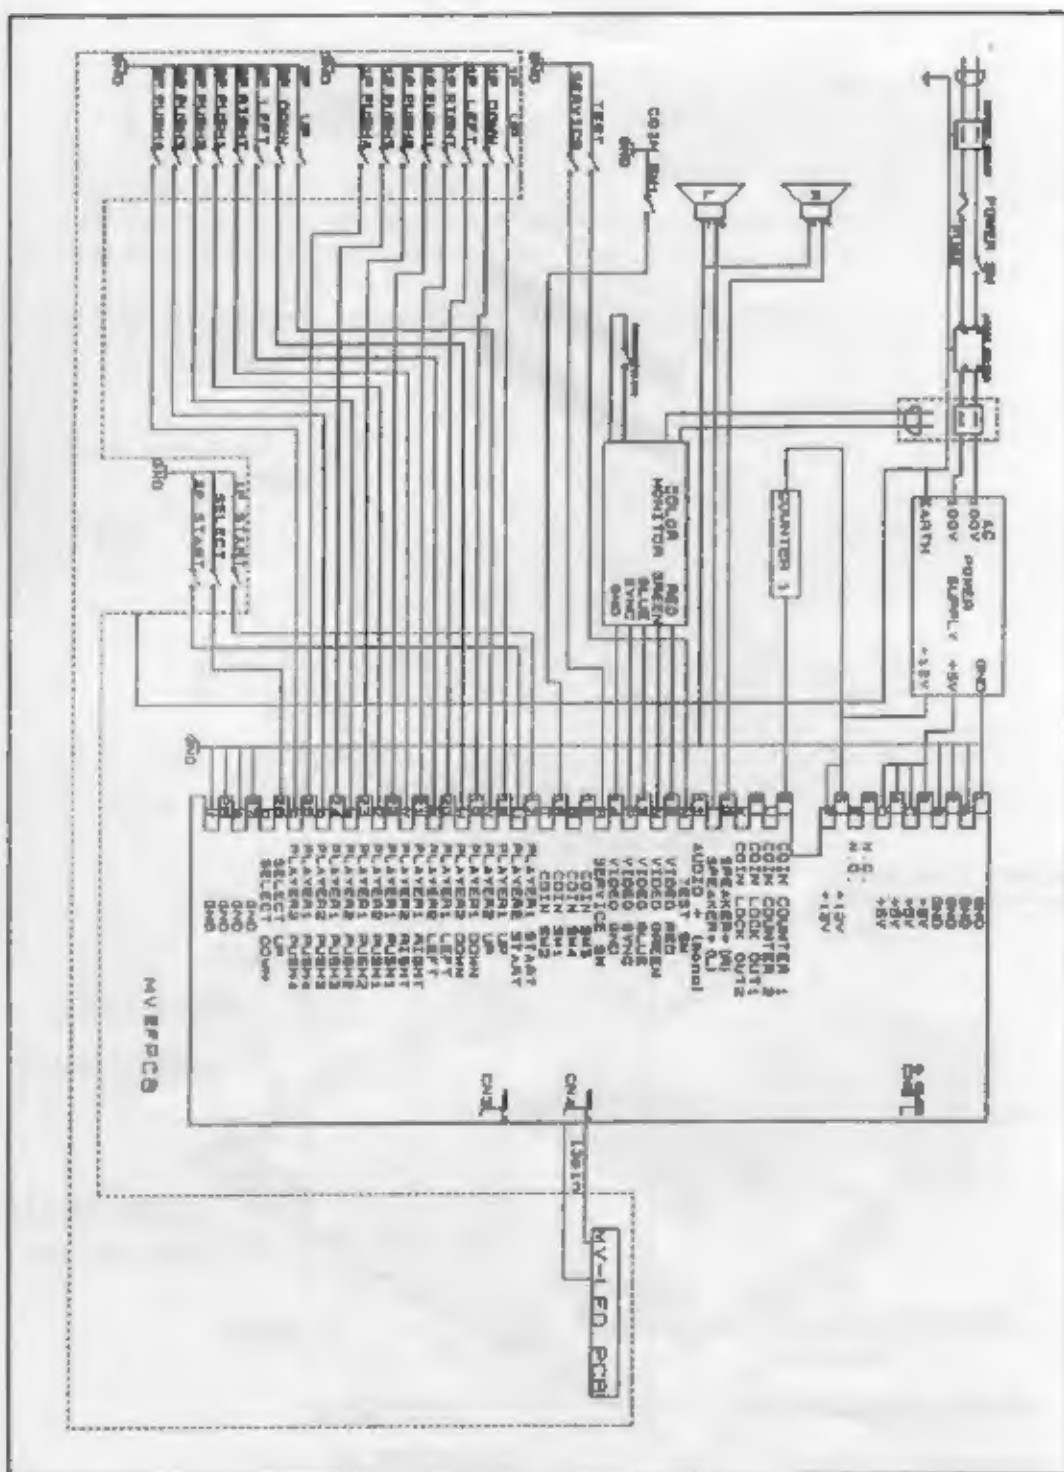

(7 SEGMENT)

# 1-3. ASSEMBLY

# 1-4. WIRING DIAGRAM

## [2] M V - 4

### 2-1. COMPONENTS

MV5 consists of the following P.C. boards.  
MV4-----Main programming, character display  
SLOT4----Switching game cartridges  
MV-LED---Credit indicator

### 2-2. HARNESS CONNECTION

MV4 and SLOT4 fit together without harnesses.  
Connection to other boards is as follows;

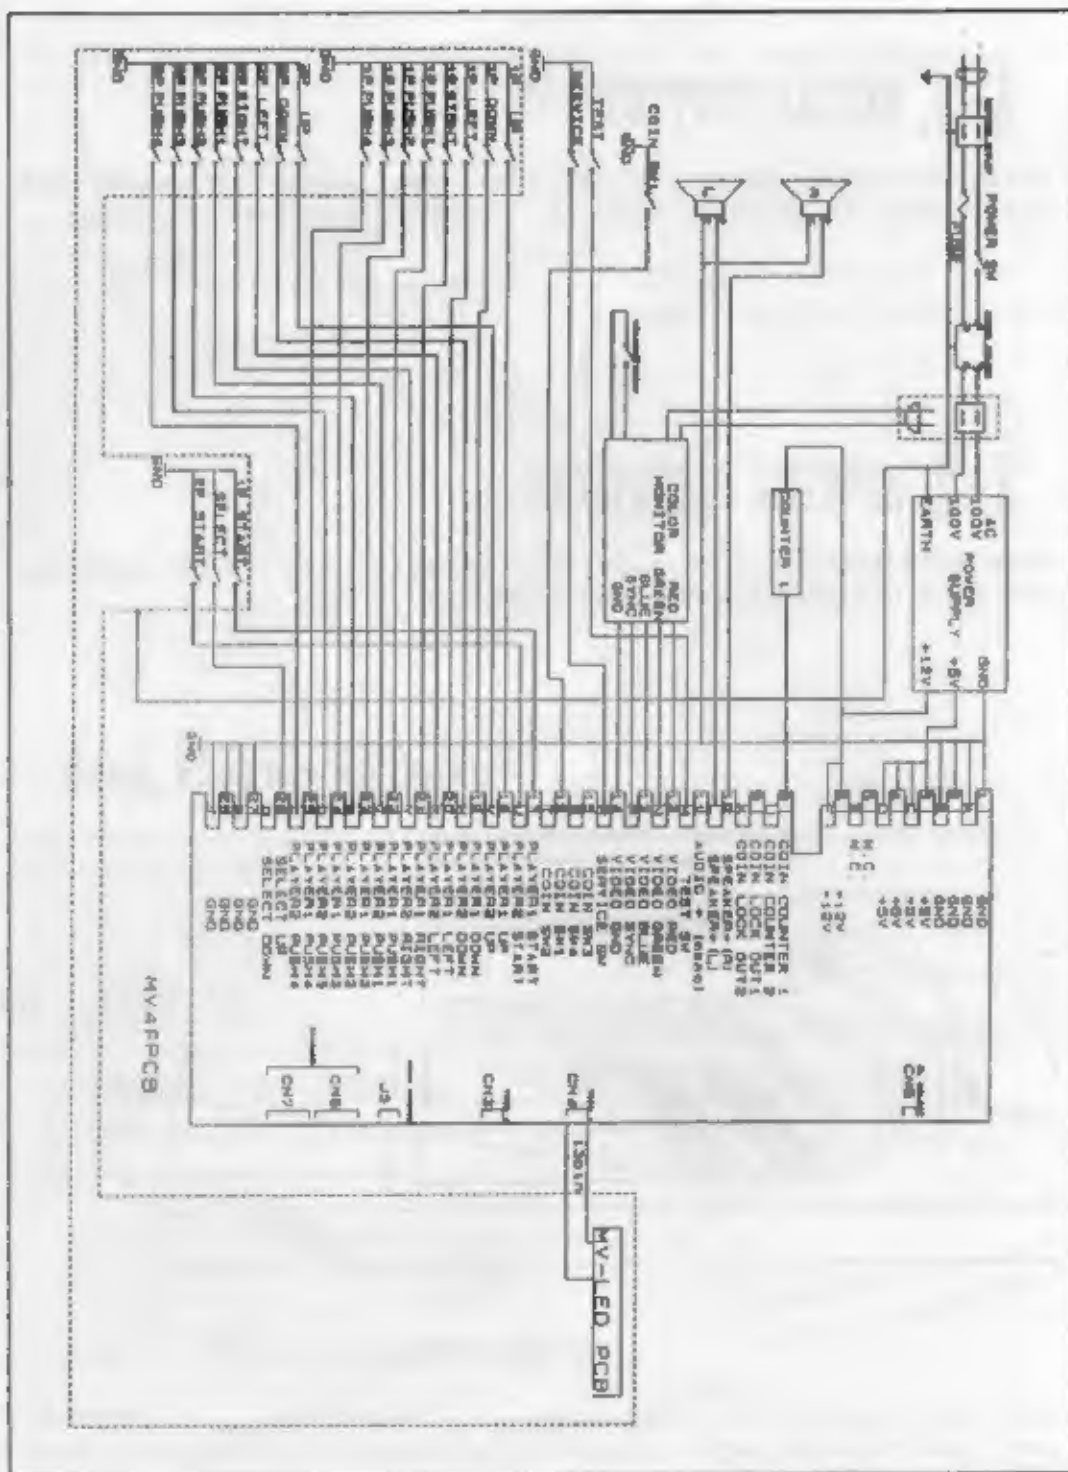

## 2-3. ASSEMBLY

## 2-4. WIRING DIAGRAM

## **[3] SETTING THE SOFT CARTRIDGES**

### **3-1. BEFORE SETTING**

Make sure that power is off when you insert or remove the cartridges. If power is not off, technical problems may occur.

### **3-2. SETTING CARTRIDGES**

Make sure that the game cartridge is installed with the markings matching the main board, then insert it firmly.

### 3-3. POWER ON

Turn the power on and gently wiggle the cartridge in the slot. If any abnormal sounds or graphics on the screen appear, turn off the power immediately and try the procedure again.

DO NOT WIGGLE  
THE CARTRIDGES HARD

### 3-4. UNUSED SLOTS

To keep the unused slots from collecting dust and things, protect the slots with the cover provided.

PROTECT THE UNUSED  
SLOTS WITH COVERS.

FIGURE OF MV-4, MV-2 HAS 2 SLOTS ONLY.

CAUTION: Do not insert any cartridge other than the MVS cartridge with the 240 pin connector. The NEO-GEO Home Use Cartridge will not fit on this connector.

## [4] INCOME DATA KEEPING SYSTEM

The MVS can keep income data of a maximum 8 games even when the power is off or the game cartridges are removed from the PCB.

For example: 2 games, A & ■ are being used on the MVS. If new game titles C & D are used to replace A & B, the previous data for A & ■ will remain.

When the game cartridges, once removed, are set again later, new data will be added to the previous data.

When more than 8 games are used, the oldest game's data will be deleted from the memory to input data for newest game. In the Fig.C, if new games I & J are used to replace any games, the data for the oldest game, A & B, will be deleted.

## 【5】TEST MODE

### 5-1. MODE SETTING

The MVS enables dip settings on the monitor screen instead of the dipswitch settings on the PCBs of other systems. Bookkeeping is also possible on the screen. Read further for each operation.

### 5-2. STARTING

Press the test switch inside the cabinet.

### 5-3. MAIN MENU

Use the joystick to move the cursor on the screen and press the "A" button to confirm mode. Press "C" button to return to the previous menu.

MAIN MENU

## 5-4. HARDWARE TEST

### HARDWARE TEST

: Cross Hatch

☞ Press the 1 player start button

☞ For adjusting color on the screen

I/O CHECK					
	P1	P2	12345678		
UP	0	0	00000000		
DOWN	0	0			
LEFT	0	0			
RIGHT	0	0		COIN1	0
PUSH1	0	0		COIN2	0
PUSH2	0	0		SERVICE	0
PUSH3	0	0		TEST	0
PUSH4	0	0		EL LED1	LED2
START	0	0		0 00	00
SELECT	0	0			

☞ Press the 1 player start button

☞ "1" stands for "on" and "0" for "off" of the dipswitch.

☞ Check if the no. of LED1 is the same as the credit display. Disregard the display of LED2.

☞ Press the 1 player start button

☞ Move the joystick up and down to select type of the sound.  
RIGHT---right speaker is louder.  
LEFT---left speaker is louder.  
CENTER..in stereo

☞ Press the 1 player start button

☞ You can check if the memory card works properly by inserting it into the memory card slot.  
NOTE: Saved data on the card will be erased.

☞ Press the 1 player start button

☞ You can clear previous data (income data, etc.) by pressing A, B & C buttons at the same time.

⌂ Press 1P button to start

SETTING UP THE CALENDAR  
CURRENT TIME  
17/ 2/90 SAT  
19:30:41  
THE TIME TO ■ SET UP  
A BUTTON, JOYSTICK=SELECT  
17/ 2/90 19:30:41

⌂ The time and date have already been set from the factory. If needed, you can change the numbers indicated in red color. ("A" button to increase, "B" button to decrease.) Press "D" button to confirm setting. NOTE: Calendar setting is not available right after the BACKUP CLEAR operation (see P.14) .

⌂ Press 1P button to start

RETURN TO CROSS HATCH

## 5-5. SETTING THE HARDWARE DIP

### HARD DIP SETTING

SETTING UP THE HARD DIP  
12345678  
SETTING MODE 1..... ON  
COMMUNICATION ...000.. OFF  
FREE PLAY .....0. OFF  
COIN SWITCH ..0..... 2  
STOP MODE .....0 OFF  
O-OFF 1-ON

⌂ Present status of the dipswitch is displayed.

SETTING MODE...Test Mode / Game Mode

DEC	55699	15519	4:20

☐ Retrieve the bookkeeping information for each title in the same way as "CABINET/COIN" and "CABINET/PLAY".

#### SETTING UP THE CODE NUMBER

CODE NUMBER SETTING  
2408  
D BUTTON: SET  
CODE NUMBER WILL BE SET INTO  
MEMORY CARD WHEN INSERTED  
DURING THIS MODE.

☐ Press "C" button twice to return to the Main menu. Move the cursor to "CODE NUMBER" and press "A" button.

☐ Move the cursor with the joystick. To change numbers, press "A" button to increase and "B" to decrease. The code number is set by pressing "P" button.

## 5-9. SETTING THE CALENDAR

To set the calendar, refer to 5-4, HARDWARE TEST.

## **[6] MAINTENANCE** Please note the following:

Ø Voltage of the power supply should be A/C between 95 and 105.  
Note: A malfunction may occur if it exceeds the electrical capacity in the cases below;

\*If a machine is consuming a large capacity of electricity when connected to the same power supply as the cabinet.

\*If several cabinets were connected to the outlet on the backside of the cabinet.

Ø When you turn the power on and the MVS will not work, check the status of the outlet, power supply and fuses.

Ø Keep the Main PCB away from dust and other objects, it may cause a breakdown or damage to the PCB.

Ø If you cannot correct any malfunctions that may be occurring, contact the selling agency of the MVS for assistance.

Ø Do not try to repair the PCBs at users' side. Electric testers might damage the IC because of their internal voltage.

Ø When you send the defective PCBs to the agency, please mention the malfunction that is occurring.

Ø Be careful to pack them firmly for shipment.
